PROFESSIONAL SUMMARY

AI-focused technology leader, AI Engineer with hands-on experience designing and deploying **Generative AI, Agentic AI systems, RAG pipelines, and large-scale data platforms**. Proven track record in building **AI SaaS products, enterprise automation, predictive analytics, and big data architectures**. Adept at leading cross-functional teams, aligning AI strategy with business outcomes, and delivering production-grade systems used by real clients. Strong fit for **AI Engineer, Staff/Principal AI roles, and Founder-level**.

CORE SKILLS

- **Generative AI:** LLMs (OpenAI, Claude), RAG, Prompt Engineering, Vector Databases
- **Agentic AI:** Autonomous Agents, Tool Use, Memory, Workflow Orchestration
- **Machine Learning & Deep Learning:** Predictive Modeling, Computer Vision
- **Data Engineering:** Python, SQL, Hadoop, Spark, Kafka, Cloudera
- **Cloud & Deployment:** Azure AI, APIs, Model Serving, Monitoring
- **Automation:** AI-driven Business Process Automation

PROFESSIONAL EXPERIENCE

AI Engineer | Team Lead (GenAI & Agentic Systems)

Mindscape Analytics LLC (USA | Remote) | Jan 2025 – Present

- Designed and deployed **LLM-powered AI assistants** using RAG over structured and unstructured data.
- Built **agentic AI systems** capable of task planning, decision-making, tool execution, and memory handling.
- Developed **end-to-end ML pipelines** for prediction, recommendation, and analytics use cases.
- Integrated vector databases and LLM APIs into production-grade systems.
- Automated data workflows and reporting significantly reduced manual operational efforts.
- Collaborated with product and engineering teams to deliver AI solutions from concept to deployment.

Big Data Administrator

Freelance (Remote, Canada) | Jul 2023 – Dec 2025

- Optimized **Cloudera HDFS ecosystems**, improved reliability and performance for large-scale workloads.
- Deployed and administered **HDFS, Impala, Hive, YARN, and StreamSets** in production environments.
- Led enterprise-grade security hardening using **SSL/TLS, Apache Knox, Ranger, and LDAP integration**.
- Automated cluster operations and data workflows, reducing operational overhead.
- Provided **L3/L4 production support**, resolved complex distributed system issues.
- Collaborated with data scientists to enable advanced analytics and BI use cases.
- Authored detailed technical documentation for system architecture and troubleshooting.

Financial Data Analyst

UBL Head Office – Speridian Technologies LLC | Mar 2022 – Oct 2023

- Awarded **Employee of the Month (Sep 2022)** for automation excellence.
- Automated enterprise financial reporting using **Python, SQL, and Oracle Analytics**, reducing reporting time from **5 hours to 15 minutes**.
- Designed executive BI dashboards, KPIs, and analytical models.
- Translated business requirements into data-driven insights for senior stakeholders.

AI Engineer Intern

Optimizia | Jun 2021 – Sep 2021

- Developed **computer vision models** using deep neural networks.
- Performed dataset preparation, labeling, and augmentation.
- I worked in agile teams delivering ML prototypes and experiments.

KEY PROJECTS

AI-Powered Multi-Tenant Inventory Management Platform

- Building a scalable, multi-tenant AI-driven inventory management system serving 50+ businesses across multiple domains.
- Designed AI pipelines for demand forecasting, stock optimization, and anomaly detection to reduce waste and stock-outs.
- Implemented automated workflows and real-time analytics dashboards to minimize manual inventory operations.
- Leveraged machine learning models, intelligent automation, and cloud-native architecture with secure tenant isolation.
- Integrated role-based access, reporting, and predictive insights for multi-location business operations.

DBLynx – AI-Powered Enterprise Database Intelligence Platform

- Architected and developed a **production-grade Agentic AI platform** enabling autonomous data analysis, reporting, and decision support for enterprises.
- Implemented **LLM-powered conversational interfaces** using **Retrieval-Augmented Generation (RAG)** over structured databases and unstructured business documents.
- Designed **agentic workflows** capable of task decomposition, tool execution, contextual memory, and multi-step reasoning.
- Integrated **vector databases, LLM APIs (OpenAI, Claude, Hugging Face), and data pipelines** to deliver accurate, domain-specific insights.
- Enabled businesses to **accelerate analytics, reduce manual data operations, and interact with data using natural language**.
- Built with a focus on **scalability, security, and enterprise readiness**, supporting real-world production usage.

BreachData – Data Intelligence & Risk Insight Platform

- Built a data-driven platform aggregating and analyzing large-scale breach-related datasets.
- Enabled intelligent search, analytics, and insights for security awareness and research.

AI Trading & Forecasting Systems

- Developed **autonomous crypto & stock trading bots** using ML and statistical models.
- Implemented backtesting, risk controls, and strategy optimization pipelines.

EDUCATION

Bachelor of Science in Computer Science

Iqra University, Karachi | 2016 – 2021

- Specialization: Artificial Intelligence, Data Engineering, Machine Learning
- Final Year Project: **Student Distraction Detection using Computer Vision & Deep Learning** (Project Lead & Backend Developer)

TECHNICAL SKILLS

Languages & Tools: Python, SQL, Git, Linux

AI/ML: TensorFlow, LLMs, RAG, Vector DBs, Agentic AI

Big Data: Hadoop, Cloudera, Spark, Kafka, Hive, Impala, StreamSets

Cloud & BI: Azure AI, Snowflake, Power BI, Tableau, Oracle Analytics

Security: SSL/TLS, Ranger, Knox, LDAP

CERTIFICATIONS

- Career Essentials in GEN AI - Microsoft & LinkedIn
- Data Science Professional - Coursera
- Machine Learning - AWS
- Neural Networks & Deep Learning
- Advanced Deep Learning with Keras -DataCamp
- Statistics for Machine Learning
- Scrum Foundation Professional
- Six Sigma White Belt
- Ethics in the Age of Generative AI
